

Rescue Cushions

Fast relief in case of a fire

Ideal in case of a fire as an **alternative to ladders** and to facilitate rapid evacuation, our rescue cushion is easy to set up and can be **deployed instantly**.

Very stable, it offers almost **no bounce-back** as it collapses towards the centre during the impact. The Rescue Cushion can easily be moved when inflated and is **compact when packed** for transport and storage. Designed to be used in conjunction with an air cylinder, it recovers its shape in seconds.

Our rescue cushions come in two formats for **jumping heights of up to 16m (CUS160)** and **23m (CUS200)**.

| | CUS160 | CUS200 |
|------------------------|---------------------------------------|-----------------------|
| Material | Polyester fabric with multi-layer PVC | |
| Working Pressure (bar) | 0.30 | 0.30 |
